

NGX, ICE Form North American Technology and Physical Clearing Alliance

- *Integrated trading, clearing offering to transform the markets for physical gas and power in U.S., Canada*
- *Joint conference call to be held at 8:45 a.m. ET (7:45 a.m. CT)*
- *Media questions are invited from 9:15 a.m. ET (8:15 a.m. CT)*

MARCH 28, 2007 (CHICAGO, IL and CALGARY, AB) -- TSX Group Inc. (TSX: X), and IntercontinentalExchange, Inc. (NYSE: ICE) today announced the formation of a transformative technology and clearing alliance for the North American natural gas and Canadian power markets. The alliance brings together the respective strengths of TSX subsidiary Natural Gas Exchange Inc. (NGX), Canada's leading energy exchange and North America's leading physical clearing and settlement facility, and ICE, the world's leading electronic energy marketplace and soft commodities exchange.

Under the arrangement, the cleared and bilateral markets for North American physical natural gas and Canadian electricity operated by NGX and ICE will be offered together on ICE's leading electronic commodities trading platform. In turn, NGX will serve as the clearinghouse for these products. This will complement the clearing ICE offers in its highly liquid over-the-counter markets for financial contracts. NGX will also use the ICEBlock^(sm) system to electronically accept for clearing off-exchange transactions in financial gas and other energy products.

NGX's highly effective clearing and settlement model has achieved unparalleled success in facilitating physical energy transactions, giving Canada exceptional liquidity in its physical gas markets. NGX has enabled almost \$300 billion of physical gas transactions since its inception in 1994. In 2006 more than 8.1 trillion cubic feet of gas traded on NGX.

ICE maintains and develops proprietary leading-edge technology for the global commodity markets. Thousands of market participants worldwide rely on the liquidity, speed and reliability of ICE's Internet-accessible trading platform. Hundreds of products are traded daily on ICE's high performance platform, which operates seven days a week, 23 hours each day. In addition, ICE offers the most liquid, cleared natural gas and power swaps markets in North America.

"This alliance will transform and grow the physical energy markets in North America," said NGX President Peter Krenkel. "We are combining the complementary, proven solutions of two established market leaders, and we'll be starting with unparalleled market penetration. Combining our physical and financial markets on a single clearing-supported technology platform will provide NGX and ICE customers with greater execution opportunities, together with a more efficient desktop and back office."

"Our agreement with NGX marks the first time that a suite of physical energy products will be offered in conjunction with the ability to clear these physical contracts on the ICE platform," said ICE Chairman and CEO Jeffrey C. Sprecher. "We are pleased to round out our offering in partnering with the clear leader in the Canadian energy markets and we see many opportunities for growth together."

"Today, ICE offers the broadest connectivity and most sophisticated technology platform for energy and commodity markets. We introduced our innovative financial clearing solution for

energy products in 2002, and NGX introduced physical clearing over a decade ago. In that time, customers have benefited from the removal of counterparty credit risk in bilateral transactions, and the liquidity that this brings by expanding trading opportunities.”

TSX CEO Richard Nesbitt said, “Since acquiring NGX in 2004, TSX has demonstrated a commitment to supporting NGX’s growth beyond Canada, as we expand our own international footprint in the rapidly expanding resources sector. This alliance marks a significant step along that path. There can be no better partner than ICE, which has established the world’s leading electronic energy trading platform and with whom we share a common philosophy on how to deliver a superior product.

“Each party pursued this alliance in the context of a long-term strategy and selected the other as its ideal partner. Over the past year, we have taken time to carefully plan and leverage the respective strengths of NGX and ICE in a way that will proactively support the evolution of the market.”

Other terms of the alliance have not been disclosed. It is not expected to be material for either party in 2007. The terms include certain usual and customary conditions, including applicable regulatory filings and approvals. The combined offering is expected to launch in the third quarter of 2007.

Conference Call

The parties will hold a joint conference call at 8:45 a.m. ET (7:45 a.m. CT) to provide customers additional information about their alliance. The call is also open to media and the investment community. Questions from the media will be taken on this call from approximately 9:15 a.m. ET (8:15 a.m. CT).
