

CS Reports Transition

May 2, 2012

TO: All NGX Customers

We have been working towards retiring our legacy reporting system (TS) and we are happy to announce that we are targeting **June 29th, 2012** to fully decommission it. To make this transition as smooth as possible, we will have both the legacy system and the new system running in parallel for a four week period.

Many of you are already on CS reports, but if you are still using legacy TS reports, please switch to new system as soon as possible. CS brings new functionality, better filtering flexibility and an overall improved user experience. Please note this change will have no impact on the ICE (Intercontinental Exchange) screens, it only applies to NGX reporting.

Please contact NGX help desk at 403-974-4357 or ops@ngx.com with questions regarding this change.

A detailed reports transition list can be found [here](#).

Thanks for your support as we go through this technical transition,

NGX
