

Force Majeure Declaration due to Planned System Outage on Alliance Pipeline Limited Partnership (“Alliance Canada”)

October 5, 2016

This is to notify all contracting parties (“Contracting Parties”) of Natural Gas Exchange Inc. (“NGX”) that pursuant to Schedule F, Section 11(G) of the NGX Contracting Party Agreement, NGX has declared a force majeure event in effect for all natural gas transactions at Alliance Canada’s delivery point APC-ATP (“ATP”) as of October 12, 2016 (Timely) and may continue for several days thereafter.

NGX determined that a force majeure event will be in effect at Alliance Canada’s ATP point as a result of Alliance Canada’s notice regarding a system outage that will occur on the pipeline system operated by Alliance Canada. This system outage has been called by Alliance Canada to replace a section of pipe at two locations where the new Regina Bypass will cross the pipeline. Please refer to Alliance Canada’s notice [here](#).

NGX has determined at this time that its force majeure declaration will reflect the **100% reduction** of supply and delivery obligations and duration as declared by the pipeline operator, Alliance Canada, for **Gas Day October 12, 2016 and any subsequent days thereafter**. NGX will promptly advise all Contracting Parties by way of a further notification of any update from Alliance Canada regarding the system outage and will advise Contracting Parties when the force majeure event is over.

The system outage declared by Alliance Canada at this time has resulted in a complete suspension of Contracting Party obligations relating to ATP during the time period set out above.

In addition, no transactions in the ATP products will be permitted by NGX during the force majeure period.

NGX staff will be communicating with traders, credit or other appropriate contacts in your organization with further information, and updated notifications will also be available on NGX's website at www.ngx.com. Please contact your NGX Marketing Representative or NGX's Operations staff at 403-974-4357 with any questions.
