

Force Majeure at Henry Hub – Ended for Gas Day Sept 18

This is to notify you that NGX is lifting the Force Majeure declaration at Henry Hub effective gas day 9/18/08. Therefore, existing contracting party obligations will no longer be under suspension and physical deliveries are expected to commence at 100% of contract requirement on gas day eighteen. In addition, cleared products will be opened and no longer be halted effective trade day 9/17/08.

On a separate note, the NGX US office in Houston is still without power, so Henry nominations will be managed from Calgary until further notice. Please contact our Calgary operations group at (403) 974-4357 in the event you have any questions.
