

## NGX / OPA Power Auction Client Installation

The NGX/OPA Power Auction client is a standalone application that allows for connectivity to the NGX / OPA Power Auction.

### Installation

- Download the software from the NGX OPA Auction Page
- Save the file to your hard drive and double-click the icon to begin the installation process.
- Follow the install program to complete the installation.
- To run the application click Start -> Programs -> NGX OPA -> NGX OPA Auction Client

### Firewalls and Networking

The NGX OPA Power Auction client requires a firewall port to be opened for it to properly connect to the server. The firewall port that needs to be opened is all outgoing traffic for TCP port 1560 to the IP address 199.185.249.16.

### Technical Contact

For any additional technical assistance or questions regarding the installation or network requirements please contact:
