

Replacement Daily Index for Spectra-Huntingdon Gas Day October 12th

October 12, 2018

Due to an announcement by the relevant index provider ("S&P Global Platts") that it would not publish a daily price for next day gas flows at Spectra-Huntingdon for Gas Day October 12th, ICE NGX will use a proxy value.

As referenced in Appendix B(d)(ii.) of the ICE NGX Index Methodology Guide, and in the absence of the regular index for the contract date, the Exchange has determined that the index used for the October 12, 2018 contract date will be **\$4.4758 USD/MMbtu**. This alternate index value was calculated as the volume weighted average of prices resulting from transactions on the ICE NGX platform for the Spectra-Huntingdon hub for flow date 10/12/18, and is published by ICE NGX as the 'ICE NGX Spectra-Huntingdon Day Ahead Index' for 10/12/18.

Please contact your ICE NGX Marketing Representative or ICE NGX's Operations staff at 403-974-4357 with any questions.
