

Technical Requirements for the new Power Auction Platform

In preparation for the transition of the NGX Power Auction from the current platform to the NGX TradePath system, occurring on June 9th, counterparties should be aware of the technical requirements to operate the system. Please review the following requirements needed to ensure uninterrupted trading access via the new platform.

- **Minimum System Requirements:**
 - **IE 9+ or Chrome (recommended)**
 - **1280 x 1040 monitor resolution**
 - **Processor Speed (CPU) Dual Core 2 GHz +**
 - **Total Memory (RAM) 4GB +**
- **Network Requirements**
 - **Network access to pa.ngx.com (199.185.249.37) on the following ports:**
 - **HTTP (TCP Port 80)**
 - **HTTPS (TCP Port 443)**
 - **Do not proxy requests to pa.ngx.com (199.185.249.37)**
 - **Bandwidth 1024kbps per user**

The new platform is browser-based, and will be accessed via the NGX.com webpage. NGX will provide access to a test environment May 26th-29th. The current NGX Power Auction client software will eventually be discontinued but should not be deleted from client desktops until notified by NGX

Any questions on these specifications can be directed to it@ngx.com.
