

Technical Requirements for the new WattEx Trading Platform

In preparation for the release of the new WattEx trading platform, coming on July 7th 2014, counterparties should be aware of the technical requirements to operate the system. Please review the following requirements needed to ensure uninterrupted trading access via the new platform.

- **Minimum System Requirements**
 - **IE 9+ or Chrome (recommended)**
 - **1280 x 1024 monitor resolution**
 - **Processor Speed (CPU) Dual Core 2 GHz+**
 - **Total Memory (RAM) 4GB+**

- **Network Requirements**
 - **Network access to wx.ngx.com (199.185.249.59) on the following ports**
 1. **HTTP (TCP Port 80)**
 2. **HTTPS (TCP Port 443)**
 - **Do not proxy requests to wx.ngx.com (199.185.249.59)**
 - **Bandwidth 1024kbps per user**

The new platform is browser-based and will be accessed via the NGX.com webpage. NGX will provide access to a test environment prior to system release. The current WattEx client software will eventually be discontinued but should not be deleted from client desktops until notified by NGX.

Watt-Ex Connector will not be impacted by this change.

Any questions on these specifications can be directed to it@ngx.com.
