RE: ICE NGX Reports

As part of ICE NGX's ongoing commitment to security we will no longer be accepting connections made to any of our secure external websites with SSL, TLS 1.0 or TLS 1.1. ICE NGX will only accept connections with TLS 1.2. All modern browsers support TLS 1.2 including Internet Explorer 11.

Please ensure you have an updated browser and check with your IT department. For specific version support please see the following article.

https://en.wikipedia.org/wiki/Transport_Layer_Security#TLS_1.2

Thank You.
