

WattEx Upgrade – March 6, 2017

WattEx will be upgrading the NGX TradePath system for the March 6th trading session.

No action is required by customers for this upgrade.

Along with a few minor bug fixes, some of the noteworthy changes are:

- New button on Market Summary and Trade Summary screens provides ability to open the next active Market Depth windows within the application as markets close during the daily schedule.
- Trade Summary screen refreshes automatically after each market close.
- Blended price field appears on the order window for standby orders.
- New visual queue to indicate when a market is within one minute of close. A bell icon will appear in the Market Summary, Market Depth, and Order Book.
- Messages and Notification List:
 - Clicking on the message slider will open the message.
 - Notification list expands when clicking anywhere on 'trades' or 'messages' labels.
 - New 'Collapse' and 'Mark all as read' buttons on the expanded view of the notification list.
- Order Book:
 - New 'Compact View' option.
 - New 'Delete All' button for Scratch Pad.
 - 'Quick Modify' window appears when clicking on the price or volume of an order within the order book.

If you have any questions, please contact the NGX help desk 403-974-4357.
